

CASE STUDY

How AXIOS reduced downtime between craft changeout on a construction project

One of the world's leading producers of engineered wood products announced plans for a multimillion-dollar expansion of its manufacturing operations in South Carolina. This new construction project's success would rely on companies that possess the ability to provide multi-disciplined services to the owner.

The Challenge

With any new construction project, proper planning and scheduling drives productivity.

For this endeavor, the owner required a specialty services contractor with the ability to provide multiple services in a manner that would promote efficiencies, while decreasing headcount and overall project expenditures.

AXIOS Industrial was built for this challenge, as we have a long history of delivering critical path solutions to organizations that value safety, productivity and predictability.

The Solution

AXIOS provided strategic plans for scaffolding and insulation and health and safety oversight that were instrumental to delivering on our best in class solutions.

We worked diligently with the owner and other contractors on the project site to maximize our time on tools. The insight on how to properly plan material delivery, equipment needs, schedule tasks and FLEX manpower was a highlight for AXIOS on the project.

Results & Benefits

Having the ability to FLEX our work crews so that as soon as a scaffold installation was completed for insulation installation, our scaffold support employees would immediately take part in the insulation support tasks. **This dramatically reduced the overall downtime between craft changeout that would be typical between multiple contractors by 20%.**

Reduced costs 15%

Lowered headcount 15%

Decreased downtime 20%

Our leadership teams partner with our skilled crafts people on all projects. Constant communication regarding daily milestone expectations along with a teamwork mentality resulted in better than expected results from our customer. Our expectation is to always outperform the schedule, and this project was no exception. The AXIOS delivery of services were so well received that we were rewarded with a long-term maintenance agreement to continue to service the customer's needs well into the future.

Maximizing on the core competencies of AXIOS, the customer reduced the number of contracted companies on the project site and benefited from the results of our planning, scheduling and execution, reducing costs and headcount by at least 15%.

Our Company

With more than 53 years of experience, AXIOS is *the* dynamic industrial services partner for customers who value safety, productivity, predictability and unparalleled expertise while utilizing the most technologically advanced systems in the industry today.

Headquartered in The Woodlands, Texas, AXIOS has operating locations strategically located across the Gulf Coast and throughout the U.S., which enables our teams of accomplished professionals to be a single source provider of multiple specialty crafts to our customers.
