

# HOW TO SELECT A PERI UP SYSTEM PROVIDER

## Five Things to Look for When Evaluating PERI Scaffolding Services Companies

While scaffolding is a necessity for industrial applications during erection, dismantling, maintenance and repairs, not all [scaffolding solutions](#) are made equal. Some excel, and we believe that one, in particular, stands head and shoulders above the rest.

PERI UP scaffolding is the industry leader in industrial scaffolding solutions, which is why we at AXIOS Industrial employ PERI UP Flex scaffold systems in our industrial services. Our goal as an industrial services provider is to maximize efficiency and prioritize safety, both of which are maximized through the use of PERI UP scaffolds.

# Benefits of the PERI UP System

Why chose PERI UP? The myriad reasons to choose PERI UP Flex include:

## Safety

There is inherent danger in working at any significant distance above the ground. Falls can be disastrous, and dropped tools and materials can cause serious injuries. The dangers can be deadly, as documented by the Bureau of Labor Statistics – which records [more than 60 deaths](#) a year from scaffolding accidents.

The PERI UP system puts safety first. Every piece of the system fits snugly together, including the flooring, to eliminate gaps. Railings are at the proper height to minimize falls. Made in Germany, the PERI UP system limits minimizes risks as much as possible.

## Customization

PERI UP Flex is unique in its approach to customization. The direction of decking can change while installing to adapt to the specifics of the application. When ordering scaffolding for a project, you can indicate what you need it to do – which means the scaffolding delivered to your site is designed for your needs.

## Non-Slip

The decking in the PERI UP system is non-slip, so your feet get solid purchase regardless of the weather or other conditions.

## Ease of Installation

Using generic scaffolds can take a lot of time and energy during planning if you have to make a round peg fit into a square hole.

Installation is totally different with PERI UP. Your design requirements are part of the process of ordering the scaffolding, so when we deliver it to your site, it goes up quickly. Combined with our engineers' expertise, the adaptability of the system makes resolving any issues and navigating around obstacles simpler and faster.

## High Load Bearing

PERI UP is a carefully engineered system designed to connect seamlessly and intelligently. The special node rigidity and PERI Gravity Lock features result in scaffolds that can handle heavy loads.

# How to Select a PERI UP Provider

When considering PERI UP provider options, there are a few things that you should look for, including:

## 1. Experience with the PERI UP System

PERI UP is intuitive and simple to use, but there is still a learning curve. When your project requires speed, precision and efficiency, you don't want to wait for your provider to figure out how to use the system. Look for a company that has a [proven track record](#) using PERI UP in applications that are similar to yours.

## 2. Planning

Our engineers draft custom 3D scaffolding designs for your project using the latest in technology. 3D models include an exact material list for each scaffold required, alleviating assumptions and guesswork from the start. This enables you to stay on schedule and within budget, with no surprises.

## 3. Safety

Even the best system can't prevent human error and negligence. When you trust a scaffold service provider to erect, dismantle and utilize a scaffold system, you want to know that they take safety seriously. Pay close attention to the safety record of all providers that you consider for your facility. Your employees' health and safety depends on it.

## 4. Responsiveness

If your scaffolding needs to be changed due to weather, changes in plans or unforeseen circumstances, you want to know that you can count on your provider to take care of it quickly. Some providers are more responsive than others, so it's important to verify the company's approach to service calls and emergencies. How quickly do they tend to respond? Do they have an app (like [AIM-POINT](#)) that you can use to contact them and report issues?

## 5. Accessibility

You deserve a provider that can arrive quickly, which is only possible if they are close enough to your facility. Make sure that your provider can access your facility with a local team in a time period that suits your requirements.

# The AXIOS Difference

At AXIOS, we're proud to be one of the premier providers of the [PERI scaffolding services](#). We have worked with numerous facilities to deliver the highest quality scaffolding and industrial maintenance solutions available. We chose PERI UP because we determined that it would allow us to deliver a level of service to our clients that no other system could. We believe there are numerous reasons to choose us as your PERI scaffolding services company, including:

## Industry Experience

Our team has extensive [industry experience](#) that we draw on to solve problems and provide customized solutions for our clients. We are able to identify solutions and deliver those solutions faster because of this experience.

## Safety Record
